I respectfully urge the FCC to reject petition 04-160. Satellite radio provides an excellent service at a reasonable price. I use the weather and Traffic features when I'm traveling. I know I have the security of always being able to find the weather and traffic without having to scan through the dial in search of the few seconds of traffic and weather on traditional radio stations. The NAB should not rely on the FCC to provide them with assistance. Instead they should focus their efforts on improving their own services.
